

Homework 5

As the last part of this course you are required to submit a Termpaper by the end of September. You already have received your topics and this last Homework should help you getting started with the Paper. In this Homework write an exposé of your Termpaper topic. The Expose should not be longer than one page and consider the following points:

- **Economic context:** Position the Termpaper's topic within the economic "reality" of the electricity sector. This should include related research topics and scope of the Termpaper.
- **Methodology:** Explain what methodology you want to use and to which topics of the Lecture this relates.
- **Data:** Describe what data is relevant for your Termpaper, what is easily available and what might be difficult to acquire.
- **Expected Results:** What kind of results do you expect and why?

Please send your exposé to riw@wip.tu-berlin.de by August 1st, 2018.

We would like to meet with each group on August 2nd or 3rd to give you feedback and help you to get started with the Termpaper.

For the Groups that are supervised by Florian Reinke of 50Hz we have to arrange a date first, all other Groups can use this Doodle to choose your preferred time-slot:
